

Lasting perfection

100%
Australian
owned brand

You'll love cooking with **Morganware** pots and pans. Dishwasher safe, they feature the non-stick Teflon Platinum Pro coating for healthy family meals

If you like to keep your family healthy, then the **Morganware** Centuria Anodised cookware Platinum Pro ranges are designed for your cooking pleasure.

With Platinum Pro's non-stick Teflon coating, low-fat cooking has never been easier – food slides effortlessly from pan to plate without the addition of oils or fats.

Three protective coatings ensure the non-stick surface remains throughout the life of the cookware. The first coat allows for the easy release of food, which makes cleaning effortless, too. The second coat provides resistance to scratching, so the surface stays non-stick, and the third protective seal covers the heavy-gauge alloy base so your pan lasts and lasts.

Non-stick
hard anodised
cookware

Cast stainless steel handles stay cool to touch even during stove-top cooking, while the snug-fitting lids lock in moisture and nutrients. **Morganware's** stunning and versatile designs – from woks and griddle pans to baking dishes – meet all the needs of the modern kitchen.
